Stabilizer Bar Rubber Bushing

At Liangju Rubber, from the beginning of your project, until the very end, we will work closely with you to make sure you are satisfied. Our sales team and technical staff are knowledgeable about manufacturing Stabilizer Bar Rubber Bushing and will meet your needs for any rubber molding project, large or small.

1. Product Introduction of the Stabilizer Bar Rubber Bushing

Liangju offers an extensive range of energy stabilizer bar rubber bushing that limit the transmission of structure-borne vibration and impacts. All of our rubber bushings are strictly follow the or original design, with the same or even better quality than original rubber bushings.

**Elimate the need for lubrication
and maintenance**

Product Introduction of Stabilizer Bar Rubber Bushing:

Stabilizer Bar Rubber bushings absorb shock and reduce vibration. Here at Liangju Rubber, we have a large selection of rubber bushings in our warehouse. A variety of the bushings we supply are OEM type, and we are capable to manufacture according to your specifications that will meet your custom needs.

2. Product Parameter (Specification)

Product Name:	Stabilizer Bar Rubber Bushing
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Automotive

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
